Dear Mr. Curie:

I read on Yahoo.com that the your department is soliciting public opinion on new government drug testing programs for the next 90 days.

I wanted to go on record as a Citizen of the United States of America that I am strongly opposed to any expansion of the spirital rapes being committed by the American government and U.S. businesses against American workers. It outrages me as a taxpayer that the money I earn by the hard fought sweat of my brow is going toward these rapes of my fellow workers. To further expand drug testing is to further demean free people to the status of serfs.

The United States ill-conceived drug war has spawned nothing but violence, corruption and the degradation of American Civil Liberties. The damage you are doing to this country with these policies are far more dangerous and destructive than all the marijuana in all the world rolled up and laid end to end.

If Federal drug testing is to be expanded I demand that it start from the top and that George W. Bush be tested on CSPAN where we the people can see that our top employee isn't as impaired as his judgement would suggest.

Laura M. Wilkerson
Spencer, Indiana
